PROFESSIONAL SUMMARY

Software Developer with 4+ years of experience building enterprise applications, operational dashboards, workflow automation, mobile applications, and data-driven systems. Currently developing software solutions at Godavari Biorefineries Ltd. across manufacturing, agriculture, distribution, monitoring, and internal business operations. Experienced across React, React Native, TypeScript, Laravel, Node.js, Oracle, Python, FastAPI, Electron, and REST APIs, with a focus on turning complex operational workflows into maintainable software.

TECHNICAL SKILLS

Frontend	React, React Native, TypeScript, JavaScript, Tailwind CSS, Bootstrap, Material UI, Redux Toolkit, Zustand
Backend	Node.js, NestJS, Express, Laravel, PHP, FastAPI, REST APIs, GraphQL
Databases	Oracle Database, MySQL, MongoDB, PostgreSQL (Supabase), Firebase Realtime Database
Desktop / Mobile	Expo, Expo Router, Electron, Python, Tkinter
Data / Monitoring	OpenCV, RTSP, WebSocket, AG Charts, PostHog
DevOps / Tools	Git, GitHub, Docker, GitHub Actions, Linux, Apache, CI/CD, PyInstaller

PROFESSIONAL EXPERIENCE

Godavari Biorefineries Ltd. | Software Developer

Sep 2025 – Present | Sameerwadi, India

- Develop enterprise applications and internal operational systems supporting manufacturing, agriculture, distribution, and business workflows.
- Build a desktop Weight Reader / Weighbridge utility that communicates with weighing equipment over TCP, persists known IP/port configuration, logs readings, and supports integration with the broader GBLAgri workflow.
- Develop Laravel/Blade-based GBLAgri modules backed by Oracle, including the Sugar Distribution billing workflow with farmer search, Cane/Seed billing, validation, preview, PDF generation, printing, and workflow tracking.
- Modernize legacy enterprise interfaces while preserving existing business rules and integrations, using Bootstrap, jQuery, AJAX, and modular Blade architecture where required.
- Build production and crushing analytics interfaces, including React-based dashboards and Electron widgets for operational visibility and real-time data presentation.
- Develop a Cane Trash Monitoring solution using Python, FastAPI, OpenCV, CCTV RTSP streams, and image-processing logic to calculate and expose operational measurements.
- Develop and deploy print/document automation workflows using PHPWord, LibreOffice, Electron, Python, SumatraPDF, queues, and a Windows print agent for reliable local printing.
- Implement product analytics instrumentation with PostHog and structured event tracking to understand usage of enterprise workflows and support data-driven improvements.
- Work across application, database, server, and deployment layers, including Oracle connectivity, PHP/Laravel deployment, Apache/Linux administration, diagnostics, and production troubleshooting.

Reknowledge Inc. | Developer

Oct 2023 – Jun 2025 | *Kitchener, Canada / Remote*

- Developed scalable React-based UI systems using Redux, Material UI, and Chakra UI, with reusable components documented through Storybook.
- Built real-time task and collaboration features using Socket.IO and WebRTC.
- Implemented CI/CD workflows using GitHub Actions and containerized deployment workflows with Docker/OpenShift.
- Developed lightweight notification services using Fastify and TypeScript, with monitoring and code-quality practices.

DGate Integrated Services | Full-Stack Web Developer

Sep 2022 – Jun 2023 | *Bengaluru, India*

- Built full-stack web applications and REST APIs for client projects, focusing on performance, reliability, and maintainable frontend architecture.
- Improved web performance using caching, image optimization, Webpack optimization, and SEO-oriented improvements.
- Collaborated with cross-functional teams to refine UI components and deliver production-ready web solutions.

SELECTED PROJECTS

NGO App — Freelance Software Developer

- Built a configuration-driven mobile application for NGO workflows using React Native, Expo, Expo Router, and TypeScript.
- Implemented reusable multi-form architecture with React Hook Form, Zod validation, and Zustand state management.
- Designed configurable application flows allowing different application types and form structures to be managed through a reusable workflow engine.

GBL Farmer App

- Enterprise agriculture platform integrating mobile/web workflows with NestJS, TypeScript, Oracle Database, authentication, and role-based access.

Plant Monitoring & Crushing Analytics

- Developed operational monitoring interfaces using React, Electron, Tailwind CSS, and WebSocket-based data flows for production and crushing visibility.

Cane Trash Monitoring System

- Developed a computer-vision pipeline using Python, FastAPI, OpenCV, and RTSP CCTV streams to process images and calculate trash-related measurements.

EDUCATION

Graduate Certificate — Web Development

- Conestoga College, Canada | Sep 2023 – Dec 2024

Bachelor of Computer Applications (BCA)

- KLS Gogte College of Commerce, India | Jun 2017 – Sep 2020

CERTIFICATIONS

- API Testing and Validation — LinkedIn Learning
- Learning REST APIs — LinkedIn Learning
- Programming Foundations: Databases — LinkedIn Learning
